# Motivation

I am hard working and will always strive to do my best in each task I set my mind to. I always stay calm under stressful situations so I will perform well in under pressure scenarios and will use my own initiative were necessary.

I am very flexible with change as there is nothing holding me back from moving or experiencing new situations. Therefore, I am always prepared to increase my knowledge and skills to equip myself further for any task, especially in the ever-improving/changing IT market.

I work well in teams with people from all aspects of life. I can take criticism and admit when I'm wrong and will then work harder to rectify it.
